The documentation for your machine anywhere,  
at any time and always updated.

La documentazione della tua macchina ovunque,  
in qualsiasi momento e sempre aggiornata.

TecnoScan is a modern QR scanning system which customers can use to consult the documentation at any time, without having to retain paper copies.

It is accessible, as well as through scanning, also via links which are sent to the customer by email. It is therefore also accessible via PC.

The CE markings on our machines contain a QR code created ad hoc for the customer; by scanning it using the camera of a smartphone or a tablet the customer can access:

- CE and/or MOCA declarations
- Use and maintenance manual
- Electrical and pneumatic diagrams
- 3D spare parts software for managing spare parts
- Videos showing maintenance procedures
- Any third party documentation

In the event of changes and consequent modification of the documentation, our operators will replace the old versions with new ones. Always available with the same QR code.

Finally, using TecnoScan, you can call us or request assistance by completing a specific form in which you can describe in detail the problem you are experiencing.

The Tecno Pack stand at Interpack gives customers the opportunity to use various tablets for scanning some QR codes attached to the machines, from which the 3D spare parts software can be accessed. In fact, it is useful for technicians to use tablets in order to carry out troubleshooting activities and to identify faulty components, conveniently using the tablet.

TecnoScan è un moderno sistema di scansione QR che consente di consultare la documentazione della macchina in qualsiasi momento, senza dover conservare copie cartacee.

E' accessibile, oltre che tramite scansione, anche tramite link che vengono inviati al cliente via email. È quindi accessibile anche tramite PC.

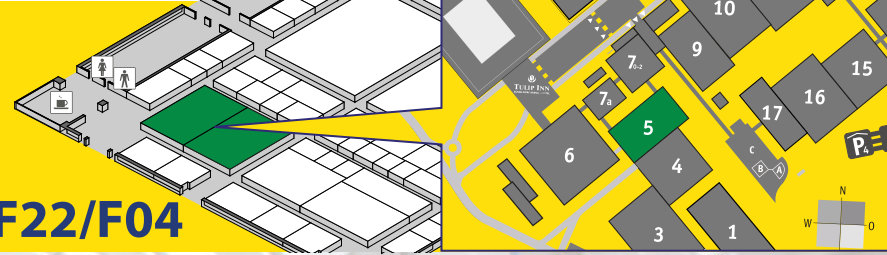

Nelle targhette CE delle nostre macchine è presente un codice QR creato ad hoc per il cliente e scansionandolo con la fotocamera di uno smartphone o di un tablet si avrà accesso a:

- Dichiarazioni CE e/o MOCA
- Manuale d'uso e manutenzione
- Schemi elettrici e pneumatici
- Software ricambi 3D per la gestione delle parti di ricambi
- Video per le procedure di manutenzione
- Eventualmente documentazione di terze parti

In caso di modifiche alla macchina e conseguente modifica della documentazione, i nostri operatori sostituiranno le vecchie versioni con le nuove che saranno sempre disponibili allo stesso codice QR.

Infine, grazie a TecnoScan è possibile chiamarci oppure chiedere assistenza compilando un modulo dedicato dove spiegare nel dettaglio il problema che si sta riscontrando.

Lo stand Tecno Pack a Interpack offrirà ai clienti la possibilità di utilizzare diversi tablet per la scansione di alcuni codici QR allegati alle macchine, dai quali è possibile accedere al software 3D ricambi. Questo sistema è utile ai tecnici per svolgere attività di ricerca guasti e identificare i componenti difettosi, utilizzando comodamente il tablet.

**Thanks for your Attention.  
See you in Düsseldorf.**
