

# Tropical Food Machinery Cutting-edge technology, research and professional ethics serving the clients' needs

**T**ropical Food Machinery is an international company with two headquarters in Italy and Brazil, leading in the global field of fruit processing machinery. Founded in the late 1970s by a pioneering Italian entrepreneur, the

company currently boasts an operating branch in the Brazilian state of Minas Gerais, two-fruit processing plants in the country's north, as well as liaison offices in India, Costa Rica, and across the Asia-Pacific and West Africa regions.

Thanks to its decades-long know-how, Tropical Food Machinery offers complete production plants for the industrial process of tropical, deciduous fruit or tomato, producing finished products like natural juices, concentrated juices, nectars, purée,

Aseptic Filler DIONE

fruit in syrup, chopped tomato pulps, sauces, and jams.

Every production plant is designed and built in-house, the designs satisfy a wide range of multipurpose technological solutions, starting from very low-capacity systems such as mobile small-size plants up to large-scale plants.

The projects include the use of aseptic filling, a technology that guarantees a shelf-stable product at room temperature (without the need for a cold chain) and is confirmed as an economical and tested solution for several types

of products. These highly specialized systems enable the product processing cycle to be traced, guaranteeing compliance with the highest quality and safety parameters.

Tropical Food Machinery offers a range of complete aseptic filling units that vary depending on the customer's marketing and logistics needs.

The Dione filling machine has been developed for filling bags with capacities ranging from 3 to 20L, making it ideal for small plants with limited production capacity seeking high-tech and qualitative processing.

The other filling units support higher production capacities and are designed for filling drums with 220L bags up to bins with 1000L bags.

## MACHINERY

Aseptic Filler TETI/2

The Calipso aseptic filler is developed for filling drums for medium-large sized plants and can be supplied with a single or double filling head.

The Teti/2 double-head aseptic filler guarantees a filling capacity of up to 12,000 l/h and is ideal for the aseptic filling of concentrated juice, whole pulp, tomato puree in drums or curing bins ranging from 5 to 1,000L.

All Tropical Food Machinery filling machines are fully equipped with cutting-edge instruments for the automatic management of aseptic filling cycles and product quality control. 🏢
